

Staying Connected: How 1 Beyond Can Help

During the COVID-19 pandemic, nothing is more important than the communication of valuable information.

Live video streams and video conferencing have become essential tools for government organizations, corporations, hospitals, houses of worship and schools.

1 Beyond's automated camera solutions for streaming, recording and conferencing can help by enabling a single on-site presenter to deliver a message without the need for camera operators or a production crew.

Please contact sales for more information at +1 (617) 591-2200 or sales@1beyond.com.

We are able to expedite shipments to meet urgent needs.

Solutions With Less Staff For Urgent Communications

Automatically Track A Presenter Without a Camera Operator

The 1 Beyond AutoTracker™ camera automatically follows a presenter using facial and motion detection.

A professor or a corporate trainer can freely walk around the whiteboard, or a pastor can still preach at their church to a home-bound congregation.

Connect to any computer running a live streaming application or a video conferencing codec, like Microsoft Teams or Zoom.

Live Stream Production-Quality Video with a Button Push

A presenter (teacher, trainer, minister or executive) can switch between video sources in any layout and automatically control cameras by pushing a button from any browser with the 1 Beyond Automate™ Select system.

Multiple cameras, content, graphics, titles and production elements like green screens can be combined in customizable layouts.

System provides sign-in for popular streaming services like YouTube and Facebook Live and easy setup for streaming to any RTMP server.
